INTRODUCTION TO DATABASES
Assignment 1

Movie database :
Import Movie.sql file

Questions :

1) Find the names of all movies that got an ImdbRating of more than 6.0 along with their ImdbRatings and sort them in decreasing order of their ratings.

2) Find the names of all the actors who acted in the movie "The Hateful Eight" and sort them in alphabetic order.

3) Get the titles of all movies, the names of all directors and the names of all the actors in a single column (the output should contain only one column) and sort them in alphabetic order.

4) Find the names of all the movies in which at least one of the Directors is also the Writer and sort them in alphabetic order.

5) Get the title and ImdbRatings of all the movies that were released in India and sort them in decreasing order of their ImdbRatings.

6) Find all the distinct ImdbRating without using the "Distinct" clause and sort them in increasing order.

Submission Format :
For each question write the output to file QNo.txt (example : 1.txt) separating fields by ',' and rows by '\n'.
Upload a zip folder containing all the txt files, with name of folder as your roll no.

Sample Command : select RoleId, Name from rolesMap INTO OUTFILE '/tmp/roles.txt' FIELDS TERMINATED BY ',' LINES TERMINATED BY '\n';
This creates a file in /tmp directory, for modifying any files here you need root privileges.
